Re: Lovington Paddock Unit #13-A, Sec 36, T16S, R36E

Dear Mr. Newport:

Our records show that the packer on the above referenced injection well was moved from a depth of 6085 feet to 5827 feet.

We are not requesting that you change the packer setting depth on this well at this time.

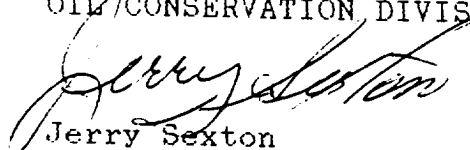

However, in the future, when it is necessary to pull the packer on any well, for any reason, you make an effort to set the packer as near as possible to the original setting depth.

If you find that it is not possible to set the packer at or near the original depth, please advise this office of the problem prior to moving the packer up hole.

We are enclosing a copy of the C-103 for your information.

Very truly yours

OIL CONSERVATION DIVISION
