Re: Lovington Paddock Unit #39-P
Sec. 36, T16S, R36E
Lovington Paddock Pool

Gentlemen:

We have approved your intention to deepen, stimulate and convert to injection. However, we have in our possession a subsequent report dated March 15, 1991, which covers conversion to injection but does not mention work done to confirm cement top.

Since this well must have the top of cement confirmed prior to injection you will need to file a C-103 covering the running of the bond log and indicate where cement top was found. If it is not sufficient to confine injected waters, report what work was done to bring cement up.

You will also need to file the cement bond log with us.

Please file report on this work as soon as possible.

Very truly yours,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District I
