Lee Whitman B #7-0 Sec. 23, T14S, R37E  
Reporting of Surface Commingled Production

Gentlemen:

According to Division Order R-1832 the production from the above-referenced leases was authorized to be surface commingled.

A review of the monthly operator's report for these leases indicate they have been combined into one lease called the Lee Whitman A & B and reported in the oil section-- not the commingled section.

Our records for these wells list them as the Lee Whitman A #1 & #4 and the Lee Whitman B #7 -- not the Lee Whitman A & B. It is presumed the OCD data processing department set up their records from the C-115 report.

In order that the statistical reports reflect the correct lease name, it is suggested that you contact Beth Martinez in our Santa Fe office at (505) 827-5817 to see how this should be set up on your C-115. We are notifying her by copy of this letter of this problem so she should be prepared to help you.

Very truly yours,

OIL CONSERVATION DIVISION
