1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. The investigator will then gather information about the problem and the people involved. This information will be used to develop a plan of action. The plan of action will be implemented and the results will be evaluated. If the results are not satisfactory, the plan will be revised and the process will be repeated. The process of the investigation is a continuous one and it is important to keep the information up to date. The investigator will also be responsible for reporting the results of the investigation to the appropriate authorities. The process of the investigation is a complex one and it requires a lot of time and effort. However, it is a necessary part of the process of law enforcement and it is important to do it right.
