OIL CONSERVATION COMMISSION
 SANTA FE, NEW MEXICO

Roswell, New Mexico
 (Place)

December 5, 1961
 (Date)

Gentlemen:

Following is a Notice of Intention to do certain work as described below at the

The Atlantic Refining Company B.C. Dickinson "B" Well No. 3 in M
 (Company or Operator) Lease (Unit)
SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 12, T. 15-S, R. 37-E, NMPM., Denton (Devonian) Pool
 (40-acre Subdivision)
Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK
 (FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS)

This well is presently completed in the Devonian formation from open hole 12,612-12,662'. We propose to set a permanent bridge plug in 7" casing at approximately 12,550' and place 30' of cement on the plug to abandon the Devonian. This formation started producing 100% water and the allowable was cancelled effective 8-1-61. We propose to block squeeze perfs 11,048' to 11,050' and 10,998' to 11,000' prior to completion attempt in the Mississippian zone. The Mississippian zone will be perforated 11,002' to 11,030' and 11,041' to 11,046' with 4 JSFF. These perforations will be stimulated by a sand-oil-fracture treatment.

Approved....., 19.....
