RE: MCCLURE C, #1
UNIT A, S14-T15S-R37E

Gentlemen:

The above referenced plugged well site was inspected on October 23, 1991, by an Oil Conservation Division Field Representative.

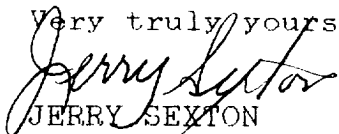

The condition of the location does not comply with Division Rules and Regulations and cannot be released until the following work has been completed.

1. Cellar needs to be filled and/or levelled.
2. Pit needs to be filled and/or levelled.
3. Remove the exposed bolts that are on the concrete pump jack base from location.
4. Remove flowline and exposed piece of tubing from location.

When these procedures have been done, please notify our OCD office by signing the bottom portion of this letter and return it to the address stated above, or contact Ray Smith at 505-393-6161.

Please check the location thoroughly to assure that all items listed above have been completed before contacting our office for reinspection, so that unnecessary trips can be avoided.

Very truly yours,

JERRY SEXTON

District I Supervisor
