# COMMUNITY ENGAGEMENT

The purpose of this document is to provide a comprehensive overview of the community engagement process. This process is designed to ensure that the voices of the community are heard and that the needs of the community are met. The process involves a series of steps, including identifying the community, establishing a relationship, and implementing a plan. The goal is to create a strong, lasting relationship between the community and the organization.

The first step in the process is to identify the community. This involves understanding the demographics of the community, the needs of the community, and the resources available to the community. Once the community has been identified, the next step is to establish a relationship. This involves reaching out to the community, listening to their needs, and building trust. The final step is to implement a plan. This involves working with the community to develop a plan that addresses their needs and goals.

Community engagement is a process that requires time, effort, and resources. It is not a one-time event, but a ongoing process. The goal is to create a strong, lasting relationship between the community and the organization. This relationship is built on trust, communication, and collaboration. The process is designed to ensure that the voices of the community are heard and that the needs of the community are met.

AREA 640 ACRES  
LOCATE WELL CORRECTLY

We propose to drill well with drilling equipment as follows:

Rotary tools from top to total depth.

The status of a bond for this well in conformance with Rule 39 of the General Rules and Regulations of the Commission is as follows:

We propose to use the following strings of casing and to land or cement them as indicated:

Size of Hole	Size of Casing	Weight Per Foot	New or Second Hand	Depth	Landed or Cemented	Sacks Cement
12 1/4"	10-3/4"	40#	New	290'	Cemented	250
8-5/8"	7-5/8"	26#	New	3000'	Cemented	500
6-1/4"	5-1/2"	17#	New	4550'	Cemented	200

If changes in the above plan become advisable we will notify you before cementing or landing casing. We estimate that the first productive oil or gas sand should occur at a depth of about 4600 feet.

Additional information: In cementing the 10-3/4" OD casing the cement will be circulated back into the bottom of the cellar. At the time all three strings of casing is set and cemented sufficient time shall be allowed for cement to thoroughly set before drilling plug and testing.
