Re: C. S. Stone (SWD) #3-F, Sec 22, T15S, R38E

Gentlemen:

The Oil Conservation Division recently witnessed an annulus pressure test on the above referenced salt water disposal well.

The injection pressure limit was increased from 980 psi to 1800 psi in 1981. The injection pressure was 1975 at the time the pressure test was witnessed.

We request that you curtail the injection pressure to conform to the approved limits.

If you feel a further increase in approved pressure limits is necessary and justified, you may wish to conduct a step rate test.

If you choose this option, please notify this office 24 hours prior to the procedure.

We are enclosing a copy of the test sheet for your information.

Very truly yours

OIL CONSERVATION DIVISION
