Re: New Mexico AS State #2-D  
Section 5, T15S, R32E

Gentlemen:

Your subsequent report of remedial work on the above referenced well has been received. The intention filed November 17, 1986, indicated you would squeeze a casing leak at approximately 7200'. However, on your subsequent report, you did not indicate that the leak was squeezed or that you checked for leak and no leak was indicated. Please advise.

Very truly yours,

OIL CONSERVATION DIVISION
