DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, comenting points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 4,300°. All casing points will be commuted in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with,

It is planned to use the following casing pattern: 8 5/8" casing to be set at approximately 200° and camented with 100 sacks, coment to be circulated. 5 1/2" casing to be set at approximately 4300° and cemented with 750 sacks Poemix 5 and 150 sacks Trinity Inferno neat around shoe.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commonsed.

- 1. Operator shall furnish and certify to the information called for in Section A.
- 2. Operator shall outline the dedicated acreage for both oil and gas wells on the plat in Section 3.
- 3. A registered professional engineer or land surveyor registered in the State of New Mexico or approved by the Commission shall show on the plat the location of the well and certify this information in the space provided.
- 4. All distances shown on the plat must be from the outer boundaries of Section.
- 5. If additional space is needed for listing owners and their respective interests as required in question 3, Section A, please use space below

* "Owner" means the person who has the right to drill into and to produce from any pool and to appropriate the production either for himself or for himself and another. (65-3-29 (e) NMSA 1953 Comp.)
