(State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On March 12, 1950, at 11:45 P.M., 8-5/8" - 24# J-55 casing was cemented at 2691' with 1800 sacks of cement containing 30 Aquagel and 100 sacks of neat cement. Cement circulated to the surface. After waiting 48 hours on cement, casing will be tested before and after drilling plug by holding 600 psi. for one hour. If a satisfactory job is indicated, drilling will then be resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
