(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Wm. Mitchell A No. 20

August 8, 1960

Well No. 20 is located 1295 ft. from 181 line and 1520 ft. from W line of sec. 20NE/4 NW/4 Sec. 20 17S 12E N. M. P. M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)Maljamar Paddock Lee New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ..... ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well with rotary tools at the above location to a total depth of approximately 5390'. All casing points will be cemented in accordance with approved methods of the U. S. Geological Survey and any other special requirements will be complied with.

It is planned to use the following pattern: 12 1/4" hole to be drilled, 8 5/8" casing to be set at approximately 920' and cemented with 650 sacks, cement to be circulated. 7 3/4" hole to be drilled, 5 1/2" casing to be set at approximately 5390' and cemented with 1200 sacks. It is calculated the cement behind the 5 1/2" casing will return to 900'.

Approval to produce this well upon completion is also requested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
