Well No. 1P 27 is located 50 ft. from N line and 2022 ft. from E line of sec. 20

17 17 30 17 30 N.M.
(4 Sec. and Sec. No.) (Town) (Range) (Meridian)
Maljamar Don New Mexico
(Field) (County or subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well is to be used as an injection well for pressure maintenance and will not be used for the production of oil and gas.

We propose to drill this well to an approximate depth of 3651'. Casing program to be as follows: approximately 60' of 10-3/4" casing for conductor string, cemented to surface; 951' of 8-5/8" casing cemented with 50 sacks if water is encountered on top of the well; 3595' of 7" O.P. casing which should put us within 50' of the top of the 6th zone. This string of casing will be cemented with 300 sacks preceded by cement mud to fill the hole to the surface.
