(SUBMIT IN TRIPLICATE)

Land Office Las Cruces
Losso No. 029509-A
Unit

UNITED STATES DEPARTMENT OF THE INTERIOR GEOLOGICAL SURVEY

Well No. Input 26 located 2615 ft. from Whine and 2615 ft. from Whine of sec 2. SE SE NW 21 175 32E N M P M (Geo. and Sec. No.) (Twp.) (Range) (Geo. and Sec. No.) New Mexico (State or Territory) The elevation of the derrick floor above sea level is 4054. ft. DETAILS OF WORK Rate names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casing; indicate mudding jobs, can ring be set in the producing formation, and will not be used as a pring well. 8-5/8" OD casing will be set in the anhydrite lying immediatel we the salt at an estimated depth of 900' and will be semented sacks of squagel. The 7" casing be set in lime immediately above the 6th zone at an estimated the of 3770', and will be cemented with 150 sacks of cement precipitation of the well will then be drilled to a depth ient to penetrate the 9th zone, which total depth is estimated of the content of the sacks of advagel. The well will then be drilled to a depth ient to penetrate the 9th zone, which total depth is estimated of the surface of the sacks of advagel. I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commanced company. Buffalo Oil Company
