If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones penetrated to this work.)

This well was acidized by the following procedure

Pulled producing equipment and acidized open hole with 6,000 gals 15% LSTNE. Placed well back on production.

Before acid treatment - Pumped 70 BO + 4BW in 24 hrs. 2-12-70
after treatment - Pumped 10480 + 17 BW in 24 hrs. 3-16-70

The "notice of intention" called for a free with explosives but due to well bore problems our plans were changed.

18. I hereby certify that the foregoing is true and correct
