Well No. **I.P. #21** is located **2615** ft. from **NE** line and **2615** ft. from **E** line of sec. **30**
SW 1/4 **30** **17 S** **22 E** **NMPM**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Maljamar **New Mexico**
(County or subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On May 1, 1951, we ran 2637' of 7" O.D. 20# new sandless casing and cemented with 300 sacks by Halliburton. After allowing the cement to set 72 hours, the plug was drilled, hole swabbed and bailed dry and drilling was resumed.

(Confirmed in telephone conversation between John Frost & Marshall Rowley - May 1, 1951.)
