This well was converted to a water injection well in conjunction with the
MCA Unit Waterflood on 10-27-63. Ran 2 3/8" injection tubing and set
a Guiberson tension packer at 3590'. The well is now ready for water
injection.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, pursuant to applicable State law and regulations. Any necessary and/or desirable conditions concerning the use of this form and the number of copies to be submitted, particularly with regard to the State or region of proposed operations, should be obtained from the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant hydrocarbon potential; amount, size, method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of placement of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking for approval of the abandonment.
