(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Fresh Water September 24, 1963

Well No. 11 is located 330 ft. from [N] line and 2310 ft. from [E] line of sec. 21W 1/4 of NE 1/4 Sec. 21 17S 32E NORTH
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Baish Lea New Mexico
(Field) (County or Subdivision) (State or Territory)The elevation of the derrick floor above sea level is NA ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well at the above location to an approximate depth of 2,400' to complete as a water injection well in the Yates Formation. All casing joints will be cemented in accordance with approved methods of the U.S.G.S. and any special requirements will be complied with. It is planned to use the following casing pattern: 11" hole, 7 5/8" casing to be set at 250' and cemented with 130 sacks cement. Cement is to circulate. 5 1/2" hole, 4 7/8" tubing to be set at 2,400' and cemented with 360 sacks cement. Cement is to return to 2,150'.

This well is to be drilled for use as a water injection well in conjunction with the Baish-Yates Waterflood. Permission is requested to use this well as a water injection well upon completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
