New Mexico Oil Conversation Commission,
Hobbs, New Mexico.

Gentlemen:

Helmerich & Payne, Inc. recently drilled a deep test well on Section 6-14s-38e, Lea County, of which I am owner of the land.

This test was not a producer and they are now closing and cementing the well. Due to this location being made on good irrigated farming land, I have been advised that according to rule 303, a sub surface marker can be made instead of the usual four foot pipe above ground. I prefer having the sub surface marker, and, am requesting that you furnish Helmerich & Payne, Inc. a statement authorizing the sub surface marker.

Thanking you for this service, I am

Very truly yours,

Mary E. Love
