This is notification that we have moved Sierra Drilling Company Rig #3 on hole. Rig up and tested BOP equipment to 5000#. Drilled out cement plugs and tested 8 5/8" casing to 1000#. No leaks. Rigged up Sperry-Sun and ran bottom hole location survey at 9922'. Found bottom of hole to be 10.42' 57° 36'E. We plan on directional drilling this hole from 9571' at an angle of 1 1/2° per 100' to TD of 12,300'±.

I talked to Dan Nutter in Santa Fe about this, and received verbal permission on 11/24/82. We will not produce this well until a hearing is held as per conversation with Mr. Nutter.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
