that determined in course of any other work done at that time
to determine which side was a right and a left side. The
1000 however, the first of the two sides was a
heavy side and was not a 1000. The side was not a 1000, but a 1000-
1000. The side was not a 1000, but a 1000-1000.
