	☐ Change of Plans
	☐ New Construction
	☐ Non-Routine Fracturing
	☐ Water Shut-Off
	☐ Conversion to Injection
	☐ Dispose Water

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In 1971 the Grayburg 6th zone was squeezed off to avoid cycling excess water through this well. Now that this part of the field is showing response to CO₂ injection the 6th zone will be re-opened to provide better pattern balance for the CO₂ flood. This work will be performed according to the procedure shown on the back of this form.

Open Additional Pay and Stimulate

It is proposed to acid stimulate the San Andres 7th and 9th zones, re-open and acid stimulate the Grayburg 6th zone as follows:

1. Pull out of hole with production equipment.
2. Acidize the San Andres 7th and 9th zones.
3. Isolate the Grayburg 6th zone.
4. Re-open and acidize the Grayburg 6th zone.
5. Return to production.
