On January 17, 1976, 5½ inch 20# and 17# csg. was set at 11,758' total depth with 250 sacks class C cement. The casing was tested to 2,000 PSI surface pressure and held. Cement job okay; work done by Halliburton.

This well was originally scheduled as a Pennsylvania Morrow sand gas test, but due to high pressures and oil recovered on a DST of the Strawn, it was decided to complete with well as a Strawn producer.
