Re: Eidson Com Well No. 1
Unit G, Section 28, T-16-S, R-35-E
Lea County, New Mexico

Gentlemen:

As requested in your letter of November 26, 1980, the subject well will be exempt from the required four point back-pressure test, and also from the 1980 shut-in pressure test required by Division Rule 402. However, since exemptions to shut-in pressure tests, which are required annually by Division Rule 402, are granted on an annual basis, only, it is impossible for us to grant an exemption to all future tests, as requested in your letter, at this time.

Further, since the well is in a non-prorated gas pool, there is no assigned allowable as such. The Form C-104 approved by this office on August 12, 1980, is your authority to produce and sell oil and gas from this well.

Yours very truly,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District 1
