Re: Testing Allowable for Mitchell B No. 20, Unit Letter "O", Sec. 18,  
T-17S, R-32W, Grayburg San Andres Zone

---

Gentlemen:

In order to evaluate the various producing zones in the Grayburg San Andres formation, it has been necessary for us to isolate and test specific perforations in the formation. We completed this process as of March 18, 1981.

We are currently waiting for the well pressure to bleed down so that we may go back into the well and retrieve the zone isolation testing tools. At that point we will be able to start testing the Grayburg San Andres formation and submit a C-104 to request a permanent allowable. Therefore, for the month of March, 1981, we respectfully request a second-month testing allowable of 1,200 barrels.

Yours very truly,

A handwritten signature in cursive script that reads "Phil T. Tucker".
