17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Plug and Abandon

The Anderson Carter Well No. 1 was drilled to a TD of 8435' in March of 1982. This development well was a southern offset to the Delmont L. Hatfield No. 1. The objective was the Abo Reef formation. The following zones were perforated with no success:

Abo from 8367' - 8372'  
Abo from 8350' - 8363'  
Abo from 8340' - 8347'  
Drinkard from 8234' - 8242'

All of the above zones were squeezed except from 8367' - 8372'. No oil was ever recovered from any of the zones tested. PBTD is 8379'. This well has been temporarily abandoned since July, 1982. Marathon proposes to set a CIBP at 8200' and spot 50' of cement on top of it. Another plug will be set at 4350' - 4250'. The 5 1/2" casing will be pulled from 3200' - surface. Top of cement is at 3450'. A 100' cement plug will be set from 3250' - 3150'. Finally a 20' cement plug will be set at the surface and a dry hole marker set.

100' PLUG AT 1500'

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
