Attention Mr. M. B. Myers

Re: Glenn Cleveland Well No. 1
Unit O, Sec. 7, T-15-S, R-35-E
Lea County, New Mexico

Dear Mr. Myers:

Mr. Paul Kautz, Geologist in this office, has made a study of the completion interval in the subject well and has concluded that it is producing from the same formation as the Morton-Wolfcamp Pool. Since it is within a mile of this pool, it will be considered as an extension of the pool rather than as a wildcat. Since the Morton-Wolfcamp Pool is on 80 acre spacing, it will be necessary for you to submit 2 copies of a revised Form C-102 outlining an 80 acre proration unit for the well.

If you do not concur with these findings, please contact this office and we will discuss the matter.

Yours very truly,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District 1
