Morton Wolfcamp Field  
Lea County, New Mexico  
Request for Testing Allowable  
C-7-15S-35E

Dear Mr. Sexton,

A C-104 requesting additional testing allowable of 683 barrels for the subject well is attached for your approval.

The well received a testing allowable of 500 barrels in January, 1983, and produced 1668 barrels during the period from January to August, 1983. The well was completed and an allowable of 1830 barrels for September - December, 1983, was received. The well produced 1345 BO during that period, leaving the well 683 BBLS overproduced for 1983. The well is currently producing 12 BOPD.

If you have any questions, please contact Bill Horne in this office.

Truly yours,

Robert R. Glenn  
District Production Manager
