Re: State NC #1-A, Sec 3, T16S, R32E

Gentlemen:

According to the sundry report (C-103) which you recently submitted, the above referenced well was converted from a producing well to a SWD well in November, 1987.

As specified by order SWD 323, your report indicates that you conducted an annulus pressure test at the time of conversion. We do not have a chart showing the test. In order to bring our records up to date, we request that you send the chart to this office.

As stated in Division Order 1100, a Monthly Water Disposal Report (C-120-A) is to be submitted for each well, beginning with the first month of disposal into the well.

In order to simplify the reporting and to bring the records up to date, you may submit one report showing the annual volume of water injected into this well as follows:

November and December, 1987
January through December, 1988
January through December, 1989
January through August, 1990

We request that you submit a report for each month beginning with September, 1990. You are to submit these reports if the well is active or shut in.

We are enclosing some blank forms (C-120-A) for your use.

Very truly yours

OIL CONSERVATION DIVISION
