Re: SANMAL QUEEN UNIT  
#8, UNIT O-S1-T17S-R33E

Gentlemen:

According to last years test information, the above well failed to demonstrate mechanical integrity during an annual bradenhead test. To this date no information has been received in regards to work performed to correct the problem. Well #8 is due up to be tested in September 1998, for this years annual bradenhead test. After researching production reports, C115 information states for the months of January 1998 through May 1998, injection figures have been submitted for this well.

Failure to shut in a well, or leave it shut in after it has been determined defective constitutes a significant non-compliance.

To avoid further action we request that you shut in this well immediately. An OCD District I Representative will make an inspection on the above well in the near future to insure compliance.

Notify the OCD 24 hours prior to any repairs and testing so that an OCD Representative may be present to witness. If repairs have been done, please submit a copy to Sylvia A. Dickey at the address stated above.

Enclosed find a copy of the C115 information referencing the above well and a copy of last years test results.

Sincerely,

CHRIS WILLIAMS  
District I Supervisor
