

SANTA FE ENERGY OPERATING PARTNERS, L.P.

Humble Hume 5A State No. 1  
Blowout Prevention Program  
Sec. 5, T16S, R34E, Lea County, N.M.

An 11" 3000 psi W.P. double ram preventer containing one set of pipe rams and one set of blind rams, and an 11" 3000 psi W.P. spherical preventer shall be installed after the 8 5/8" casing is set. The blind rams will be pressure tested to 3000 psi and the spherical preventer and the casing will be tested to 1500 psi prior to drilling out the 8 5/8" shoe.

A 3000 psi choke manifold consisting of one manual choke and one hydraulically operated choke will also be installed and pressure tested to 3000 psi prior to drilling out the 8 5/8" shoe.
