

This may not be the same sand that produces in the Newbourne Well and may not be part of the Atoka Channel as shown on this isopach.
In that case, the Channel would have a more northeasterly trend and would not be as wide as this interpretation.

EXHIBIT NO. 2
HUME DEEP AREA
LEA COUNTY, NEW MEXICO
ISOPACH
Contours on: Atoka sand thickness
Contour Interval: 10'
Date: 3-6-90
Scale: 1"=2000' Geology by: DET
