Attn: Mr. Mike Stogner

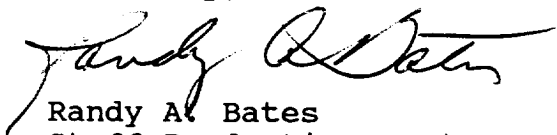

RE: Genesis #1-P  
Sec. 22, T16S, R38E - East Garrett Drinkard Pool

Sir:

As per our conversation of September 5, 1991, I have recalculated the bottomhole location at the depth of perforations. With the perforations from 8,076' to 8,164', the displacement at 8,151' of 155.33' South and 136.28' East was used to determine the bottomhole location at the producing perforations. Using these figures, a bottomhole location of 393.67' FSL and 365.72' FEL does meet the spacing requirements as outlined in DD-60.

Should you have any need of any further information regarding this well, please contact me in the Midland Office at (915) 688-0600.

Sincerely,

  
Randy A. Bates  
Staff Production Engineer
