Re: Unorthodox Locations
Western State Waterflood
Maljamar Grayburg San Andres Field
Lea County, New Mexico

Dear Mr. Stogner:

The Wiser Oil Company requests approval for two outside and one inside unorthodox locations on the subject waterflood lease. The applicant is the offset operator. These locations designated Western State Nos. 18, 19, and 20 are shown on the attached map. The locations of these wells are as follows:

Western State No. 18	Western State No. 19	Western State No. 20
Unit K	Unit O	Unit H
1355' FSL & 1351' FWL	50' FSL & 2592' FEL	1408' FNL & 1206' FEL
Section 17-T17S-R33E	Section 17-T17S-R33E	Section 20-T17S-R33E

These wells will more efficiently and effectively establish the pattern of the waterflood as set out by Order No. R-2157.

Attached are copies of the C-101, C-102, map showing existing wells, proposed wells and proposed access roads and plat of the waterflood area showing the original 80-acre 5-spot waterflood patterns. It is anticipated that the injection pattern will become a 40-acre 5-spot pattern.

Your earliest consideration of this request will be appreciated as it is desired to start drilling during the week of July 15, if possible. Should you have any questions or require additional data, please contact the undersigned in Artesia at 748-3352.

Sincerely,

Perry L. Hughes
Agent for
The Wiser Oil Company
