12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Conoco has an approved APD for its proposed Anderson Ranch Unit No. 21, which is expected to spud about November 3, 1993. It is proposed to move the location for this well 280' to the south of the permitted location of 1980' FSL & 850' FWL. The distance from the west line is not being changed.

As shown by the attached C-102 for this new location, it was actually surveyed and the pad for this drilling location built in 1988. So drilling operations can begin as soon as this change of location is approved.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
