SUBSEQUENT REPORT OF:

REMEDIAL WORK ☐ ALTERING CASING ☐

COMMENCE DRILLING OPNS. ☐ PLUG AND ABANDONMENT ☐

CASING TEST AND CEMENT JOB ☐

OTHER: ☐

12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The State "D" Well No.8 is currently listed in the West Lovington Strawn Pool. DST pressure data for this well on 10/19/96 indicated a reservoir pressure of 3647 psia. A shut in pressure build up survey performed on all wells within the West Lovington Strawn Unit and the State "S" No.1, all within the West Lovington Strawn Pool, during July 1996 indicated a field or pool reservoir pressure at 3279 psia, which is of public record. A subsequent shut in BHP survey of the same wells in February 1997 indicated the field reservoir pressure at 3262 psi. These pressures indicated that the State "D" Well No.8 is not and should not be shown to be a part of the West Lovington Strawn Pool and therefore should be moved to the South Big Dog Strawn which was recently created and whose boundary is within 330' of this wellbore.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
