At the present time, this well has an extremely high bottom hole pressure. Yates Petroleum Corporation respectfully requests permission to produce only the top set of perforations - 12301-12316' (Morrow) until the pressure goes down. At that time, we will go back in and pull the RBP at 12365' and produce both zones together (12301-12316' and 12425-12448') (Morrow).

NOTE: When work is done, a sundry notice will be sent in.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
