

3. MUD PROGRAM

Interval	Mud Type	Weight	Viscosity	Fluid Loss
0 - 400'	Fresh Water Gel	8.6-9.4	30-36	No Control
400' - 4600'	Fresh Water to Brine	8.7-10.2	32-34	No Control
4600' - 5400'	Salt Gel/Starch	10.2-10.4	32-38	<12

Sufficient mud material(s) to maintain mud properties, control lost circulation and contain a blowout will be available at the well site during drilling operations.

4. EVALUATION PROGRAM

Logs: FDC/CNL; HALS/GR-Platform Express TD to 2500'; GR/Neutron to surface.

DST's: As warranted.

Cores: None anticipated.

Samples: 10' samples from under surface casing.

*Pull Gamma Ray/Neutron Log Back to Surface

The evaluation program may change at the discretion of the well site geologist.

5. ABNORMAL CONDITIONS

No abnormal temperatures or pressures are anticipated. No H₂S has been encountered in or known to exist from previous wells drilled to similar depths in the general area.
