

34. It has long been the practice in New Mexico that the operator is free to choose whether to drill first, whether to pool first, or whether to pursue both contemporaneously. The Oil and Gas Act explicitly permits an operator to apply for compulsory pooling after the well is already drilled. See NMSA 1978, § 70-2-17(C) (the compulsory pooling powers of the Division may be invoked by an owner or owners "... who has the right to drill *has drilled* or proposes to drill a well [sic] ..."). Issuance of the permit to drill does not prejudice the results of a compulsory pooling proceeding, and any suggestion that the acreage dedication plat attached to an application to drill somehow "pools" acreage is expressly disavowed. If acreage included on an acreage dedication plat is not owned in common, it is the obligation of the operator to seek voluntary pooling of the acreage pursuant to NMSA 1978, § 70-2-18(A) and, if unsuccessful, to seek compulsory pooling pursuant to NMSA 1978, § 70-2-17(C).

35. Thus, where compulsory pooling is not required because of voluntary agreement or because of common ownership of the dedicated acreage, the practice of designating the acreage to be dedicated to the well on the application for a permit to drill furthers administrative expedience. Once the application is approved, no further proceedings are necessary. An operator may first apply for a permit to drill a well and may thereafter pool (on a voluntary or compulsory basis) separately owned tracts to the well. Alternatively, the operator may first pool and later seek a permit to drill. The two are not mutually exclusive, and there is no preferred methodology.

36. Thus, the process fosters efficiency by permitting a simple approach in cases where ownership is common and pooling, voluntary or compulsory, is not necessary.

37. Ocean's expiring farm-outs present a difficult problem because the delay occasioned by this proceeding and any delay that might occur in the pending compulsory pooling cases may place Ocean's interests in jeopardy. It is worth noting that Ocean's interests seem to be free of the title issues plaguing the other parties, but since Ocean Energy intended that Arrington drill and become operator, Ocean isn't planning on preserving its rights by drilling a well itself and hasn't applied for a permit to drill. Unfortunately, this body is without authority to stay expiration of the farm-outs; Ocean should petition the District Court for relief if the expiring farm-outs are a concern.

#### **CONCLUSION OF LAW:**

The Oil Conservation Commission has no jurisdiction to determine the validity of any title, or the validity or continuation in force and effect of any oil and gas lease. Exclusive jurisdiction of such matters resides in the courts of the State of New Mexico.

#### **IT IS THEREFORE ORDERED:**

1. The portion of TMBR/Sharp's application in Case No. 12731 seeking to void permits to drill obtained by Arrington is granted. **The permits to drill awarded to**
