17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

In 1976 the Oil Conservation Commission and you approved our plans to convert this well to water disposal. The water is produced water from the No. 2 and No. 3 wells on this lease only. This well takes 20-30 bbls of water per day on a vacuum and no pumping equipment will be used. Packer was set at 4000', annulus filled with inert water, and vacuum gauge on back side to show possible communication. Well is taking water but if well will not take all lease water it will be hauled off.
