Well No. **Federal "L"** is located **640** ft. from **S** line and **640** ft. from **W** line of sec. **30**
1-30
Sec. 30
10N (Twp.) **32E** (Range) **N.M.P.M.** (Meridian)
Washington (County or Subdivision) **New Mexico** (State or Territory)
Washington (Field)

The elevation of the derrick floor above sea level is **3022** ft. **ground level.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 4400' Grayburg test.

We propose to set approximately 100' of 7" surface casing.

We plan to set a 4 1/2" oil string through any pay and cement it so as to isolate the salt section.

All casing will be run and cemented using methods approved by the U. S. G. S.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
