Artesia, N. M. August 8, 1953, 19

Well No. test # 1 is located 330 ft. from N line and 2758 ft. from W line of sec. 6

18 32E 18 18
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Watkins-Crookburn Las New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

For our report of 7-21-53 we have planned this well as follows: The well was drilled to a TD of 4258 and plugged back to 4088 in testing. We cemented back to 3700 and cut the 5 1/2" casing off at 3000 feet and pulled same. We filled the hole with mud and set a plug of 10 sacks of cement in the bottom of the 3 5/8" casing set at 1812 feet. We cut off the 3 5/8" at 382 feet and pulled it. We filled the hole with mud to surface and put a plug of 10 sacks of cement in the top of the hole. We then cemented the cellar, put up a marker and cleaned up the location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
