(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

East Lusk Las New Mexico

(Field) (County or Subdivision) (State or Territory)

Ground level

The elevation of the derrick floor above sea level is 2550 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill this well to a total depth of approximately 2600 feet to test the Yates Seven Rivers formation. We will set approximately 350 feet of 5 1/2" casing cementing with 50 sacks, and an oil string of 5 1/2" at approximately 2550 feet and cement it with 100 sacks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
