FORM APPROVED
OMB No. 1004-0135
Expires November 30, 2000

SUNDRY NOTICES AND REPORTS ON WELLS

Do not use this form for proposals to drill or to re-enter an abandoned well. Use Form 3160-3 (APD) for such proposals.

File Serial No.
NMLC 062391

6. If Indian, Allottee or Tribe Name

7. If Unit or CA/Agreement, Name and/or No.

8. Well Name and No.
Wyatt B #1

9. API Well No.
30-025-01372

10. Field and Pool, or Exploratory Area
Corbin Abo

11. County or Parish, State
Lea
NM

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Reference is made to Non Compliance Issue Order AJM-L86-01 written June 14, 2001 by Hobbs Inspection Office & to the Certified Letter dated August 29, 2001 43 CFR 3161.1 from Andy Cortez

A recent attempt to restore economic production from the Abo (8540'-8764') was unsuccessful. There is a remote possibility, depending on further review; another recompleat of the Abo will be attempted. There is more interest and a higher probability of restoring economic production from this wellbore in the Queen formation (4000'-4050'), however. The anticipated date that this workover can be done is the first quarter of 2002, due to a potential buyout of a major working interest owner in this leases. The sale should be finalized during the fourth quarter, 2001. The wellbore has been determined to have a casing leak in the top joint of pipe. There is a CIBP @ 8510' above the Abo zone, isolating all the perforated zones in this well from casing above. The casing tests good from 8510' to the hole in the top joint. It is respectfully requested that this well's TA'd status be approved until 3/2002 which should allow enough time to execute the proposed action plan. The proposed Queen perforations are behind 8-5/8" intermediate casing and we intend pulling as much 5-1/2" casing as possible.
