The elevation of the de	errick floor above sea	level is	ft.	

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to test the red and, expected at about 3900 feet. 8 5/8" surface easing will be not by retary tools at approx. 1400 feet and commuted with 50 eachs. 7" easing will be run to the top of the red and at approx. 3900 ft. and commuted with 100 make. Gable tools will be moved on after surface casing is set.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
