

- G. Land Use: Grazing and Hunting in season.
- H. Surface Ownership: Thw well site is on private surface belonging to Mr. Dallas McCasland, P. O. Box 206, Eunice, New Mexico. Telephone # 505/394-2581.

Mr. McCasland has been notified of our intent to reenter and plug the captioned well and we have reached an amicable agreement concerning rehabilitation requirements which entails:

Upon completion of the plugging job, any plastic material used to line pits or sumps shall be cut off below ground level, as far as possible, and disposed of before the pits are covered. All unattended pits containing liquid will be fenced and the liquid portion allowed to evaporate before the pits are broken and backfilled.

All waste associated with the plugging operation will be buried in place in a separate pit. All garbage and debris left on the site will be buried at least 3 feet deep.

After the well site is cleaned and pits used and sumps backfilled, any obstruction to the natural drainage will be corrected by ditching or terracing. All disturbed areas will be ripped and reseeded with grass if in Mr. McCasland's opinion, it is required.

12. Operators' Representatives
