The elevation of the derrick floor above sea level is **3943** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The following program was used to plug this well:

Ran 15 sack cement plug at TD of 4424.

Ran 15 sack cement plug at 1385'.

Ran 15 sack cement plug at 936'.

Ran 5 Sack cement plug at surface.

Erected 4"x8" pipe marker properly inscribed.

Will notify the U.S.G.S. by telephone when final clean up is made and location is ready for inspection.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
