Well No. **5** is located **460** ft. from **N** line and **1980** ft. from **E** line of sec. **13**

SW/4 SE/4 **13** **18S** **33E** **NMPM**

AK Queen **Los** **New Mexico**

The elevation of the derrick floor above sea level is **3839** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to an approximate total depth of 4400' to test the Queen formation. We will run approximately 300' of 8 5/8" casing and circulate cement to the surface. We will run approximately 4400' of 5 1/2" seamless casing and cement with 400 sack of Pozmix cement, 4% gel and 125 sacks of neat cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
