DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This test was drilled to a total depth of 4342' in the Queen sand. It was temporarily abandoned, May 14, 1958.

The casing previously run is still in place.

There is presently an 1 5/8" x 2" sewage with an orbit valve on top, closed in.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
