## New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 3904ft. CL

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I Propose to drill this well to an approximate depth of 4650' to test the regular Queen pay. 300' of 8-5/8" OD Casing will be run and cemented to the Surface. If production is encountered 5-1/2" OD Casing will be run to total depth and Cemented with 200 sacks of Cement.

Rotary tools will be used.

**I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.**
